-On Tuesday last the prisoners in Clarksville, Ark., jail overpowered the guards and took possession of their arms. The alarm was given before they got out, and the citizens of the town surrounded the jail. One of the prisoners, Sid Wallace, sentenced to be hung, fired a double-barrel shot gun at two citizens in the street, severely if not fatally wounding both. The citizens then took possession of the first floor of the jail, put five kegs of powder in it, laid a train for some distance, and notified the prisoners that a class they surrendered in thirty minutes they would blow up the building. After a little parley they surrendered, throwing their arms out at the window. As one of the guns struck the ground it went off, slightly wounding three persons.

bustle and activity not surpassed since the war. In case of hostilities, it will be an important station, being the nearest navy-yard of consequence to the West India islands. Preparations are making for any emergency, and vessels loaded with coal, ship-timber, etc. are daily arriving. Work on the Galena and a new sloop-of-war, are being pushed forward rapidly. It is understood that the force of workmen will be largely increased. A careful inspection of the fort has been made and the weak points are being strengthened. The Rip-Raps and Fort Wool can be put in a state of defense in ten days. That and a judicious distribution of torpedoes will protect the harbor. The present force in the machine shop, at the fort, are busy altering and inproving tifteen inch gun carriages for southern coast

The demand for the five raiders and murderers is not remitted, and if not complied with in ten days after the receipt of this dispatch you will stop their rations entirely, and if they still refuse they will be hand d over to the military. Assure the Indians that the government is in earnest, and that arrangements are already being made to compel the Comanches to do right.

-Since the withdrawal of the United States marshals from Ludian territory, the number of murders is largely on the increase. The agents of the various tribes say it is absolutely seccessary for congress to interfere and give the civilized Indians a government that will protect life and property. The assassinations in the territory averaged twenty per month during the past summer, with not one execution, under Indian law. The Creek council adjourned without doing anythin , except to pass a law forbidding any Indian to rent to or permit any white person to occupy any building in the Creek nation. They refused to allow white railroad employes and others to build houses for school and church purposes

-From statistics gathered by B. F. Howard, secretary of the national pork packers association, it appears that the number of hogs packed to date this season in Chicago, Cincinnati, St. Louis, Louisville, Milwaukee, Indianapolis, Peoria, Illinois, and Desmoins, Iowa is 680,667, or 183,394 more than at the same period last season. This, ogether with the fact that the address on the box was made up of etters out of a newspaper, or some printed document, created suspicion. This defeats both alive to the crisis in quiet preparation for the the Pennsylvania and Rosecrans projects, and future. leaves the matter in the hands of Mexicans, who will doubtless interest other parties in the enterprise, or dispose of their concession to the greatest advantage to themselves.

-Dispatches from Madrid agree in repre enting that the late interviews between Minster Sickles and the Spanish authorities were of a stormy character. Sickles barely escaped mobbing by the crowd which congregated in front of his residence. In consequence of these demonstrations he determined to leave Madrid, but the government having dispersed the mob and since maintained peace, he has resolved to remain in the city.

-Later dispatches have been received from Gen. Wolsely, commanding the Ashantee expedition. They condemn the native auxiliaries as worthless. The Ashantees are in full 151/4@161/4e: good middling, 161/4@17c. retreat. -A communication from the Spanish colenial minister to the political governor of the island, under date of the 24th inst., is published n the official gazette. It is, in substance, as follows: The government of Spain, resolved to secure faithful observance of treaty agreements between Spain and foreign nations, de siring to avoid all grounds for demands from citizens of such nations, and moved by the same reasons which impelled the council of ministers to direct a predecessor of your excellency, then in command of the island, has de cided that you should order the immediate and strict compliance with the instructions of the ministry under my charge, and should place estates of foreign citizens acquired through the action of gubernatorial administration, in such position that those having rights therein may enter into possession. By order of said government, I communicate this to your excellency that it may take effect as decided, which, by order of his excellency, is inserted in the Ga eta for general information.

GENERAL.

-The chief engineers corps has ordered officers in charge of harbors to put them in proper defense, and torpedoes, with necessary electrical cable instruments, to be planted along the coast.

The war department has issued a general order requiring that all disbursing officers, so far as practicable, keep the bulk of all public funds advanced to them on independent treas ury offices, and limit the deposits in local depository banks to such amounts only as may be absolutely necessary for small local pay-

The transportation of ordnance stores to Key West will also be stopped. There is no possibility, it is said, of settling the diplomatic controversy between Spain and the United States for many months to come, which ac-

It is thought that the house of representatives may be disposed to push the administration to extremity with Spain, but that the senate will be more moderate.
